This website/brochure is being developed by 97 Bay Harbor Islands, LLC, a Delaware limited liability company ("Developer"), solely and all materials, descriptions and/or representations, which are deemed made by Developer and accepted to look solely to Developer with respect to any and all matters relating to the marketing and/or development of the Condominium and with respect to the sales of units in the Condominium. Only representations expressed in writing by the representatives of the Developer, the contract, Prospectus/Offering Circular, and/or referred to therein (including and the Prospectus) required by section 718.503, Florida Statutes, to be furnished by a developer to a purchaser or lessee. There materials are not intended to be an offer to sell or solicitation to buy a unit in the condominium. Such an offering shall only be made pursuant to the prospectus (Offering Circular) for the Condominium and the statements contained therein shall be relied upon solely made in the prospectus or in the actual subsequent lease agreement. In no event shall any units, fixtures, offer or sale of a unit in the condominium be made to, or furnished to, any state or country in which the offering would be unlawful. Stated square footages and dimensions are measured to the outer boundaries of the exterior walls and the centerline of interior demising walls, and in each case from the square footage and dimensions that would be determined by using the rules of measurement and definitions of the "BOMA" (as defined in the Condominium Docs) generally only includes the interior area of a unit between its perimeter walls and excludes all interior structural components and other common elements. This method is generally used in sales materials and is provided to allow a prospective buyer to compare the Units with other comparable projects that utilize the same method. Measurements and floor plans set forth on this floor plan are generally taken at the furthest points of each room (as if the room were a perfect rectangle), without regard for any nubs or variations. Accordingly, the area of the actual room will typically be smaller than the product obtained by multiplying the stated length and width. All dimensions are approximate which will vary with actual construction, and all floor plans, specifications and other development plans are subject to change and will not necessarily accurately reflect the final plans and specifications for the development. The project graphics, renderings and any references, owned by the Developer. All rights reserved. Unauthorized reproduction, display or other dissemination of such materials is strictly prohibited and violation copyright infringement. No real estate broker is authorized to make any representations or other statements regarding the property, and no agreements with brokers need to be in writing or approved in writing and above brokers are or shall be working under Developer's exclusive listing opportunity.
